1. Executive Summary

BIGGO COIN is a community-powered digital economy built on **BNB Smart Chain (BEP-20)**, designed to deliver a transparent, secure, and sustainable Web3 ecosystem that encourages meaningful community participation and long-term utility.

Rather than focusing on speculative use cases, BIGGO COIN is designed to support practical ecosystem engagement through a suite of integrated products and services. The ecosystem is centered around the **BIGGO Reward Center**, **BIGGO Revenue Engine**, **BIGGO Marketplace**, **BIGGO Launchpad**, **Treasury Transparency Dashboard**, and **Automatic Buyback Program**, each contributing to the long-term sustainability and responsible growth of the platform.

The project emphasizes transparency, responsible treasury management, ecosystem utility, and continuous innovation. Through secure blockchain infrastructure, clearly defined tokenomics, and community-oriented development, BIGGO COIN aims to create lasting value for users, partners, and the broader digital economy.

This whitepaper provides an overview of the BIGGO ecosystem, its core utilities, token economy, security principles, development roadmap, and long-term vision. It is intended to help community members, partners, and stakeholders understand the project's objectives while maintaining a concise, accessible, and transparent presentation suitable for public release.

2. Why BIGGO?

Building a Trusted, Transparent, and Sustainable Digital Economy

The blockchain industry continues to evolve, creating increasing demand for ecosystems that combine practical utility, transparent operations, responsible treasury management, and sustainable long-term growth.

BIGGO COIN is designed to meet these expectations through a community-powered ecosystem built on **BNB Smart Chain (BEP-20)**. Rather than focusing on speculative use cases, BIGGO integrates practical ecosystem utilities that encourage meaningful participation while promoting transparency, innovation, and responsible ecosystem development.

Why BIGGO Stands Apart

Community-Powered Ecosystem

BIGGO is designed to encourage active community participation through an ecosystem that values transparency, collaboration, and long-term engagement.

Practical Ecosystem Utility

BIGGO provides an integrated ecosystem where users can participate through:

- BIGGO Reward Center
- BIGGO Revenue Engine
- BIGGO Marketplace
- BIGGO Launchpad
- Treasury Transparency Dashboard
- Automatic Buyback Program

Each component is designed to complement one another while supporting practical ecosystem participation.

Diversified Revenue Model

The BIGGO Revenue Engine is designed to support ecosystem sustainability through diversified revenue sources that contribute to platform development, responsible treasury management, ecosystem expansion, and long-term community growth.

Transparent Treasury Management

Transparency is one of BIGGO's core principles.

The Treasury Transparency Dashboard is designed to provide greater visibility into treasury management while reinforcing accountability and responsible ecosystem operations.

Why the BIGGO Ecosystem Matters

The BIGGO ecosystem is designed around a unified framework where each core component contributes to the long-term sustainability of the platform.

This integrated approach encourages responsible participation, supports ecosystem development, and strengthens transparency while creating practical utility for community members, ecosystem partners, and future platform expansion.

Long-Term Ecosystem Sustainability

The Automatic Buyback Program supports the ecosystem through responsible treasury management that aligns with the project's long-term sustainability objectives.

Built on BNB Smart Chain (BEP-20)

BIGGO COIN is deployed as a BEP-20 utility token on BNB Smart Chain, providing a secure, efficient, and scalable blockchain infrastructure for ecosystem growth.

Core Principles

Principle	Description
Transparency	Promote openness and accountability across the ecosystem.
Practical Utility	Deliver meaningful ecosystem products and services.
Sustainability	Support responsible long-term ecosystem development.
Security	Build on secure blockchain infrastructure and responsible operational practices.
Innovation	Continuously improve ecosystem capabilities and user experience.
Community Collaboration	Encourage active participation and long-term community engagement.

Key Advantages

- ✓ Community-Powered Digital Economy
- ✓ Practical Web3 Ecosystem
- ✓ Diversified Revenue Engine
- ✓ Transparent Treasury Management
- ✓ Responsible Ecosystem Growth
- ✓ Long-Term Sustainability
- ✓ Built on BNB Smart Chain (BEP-20)
- ✓ Secure BEP-20 Utility Token
- ✓ Transparent Tokenomics
- ✓ Investor-Friendly Public Whitepaper

Closing Statement

BIGGO COIN is committed to building a trusted, innovative, and community-powered digital economy through practical ecosystem utilities, transparent treasury management, responsible development, and continuous innovation. By combining community participation with sustainable ecosystem principles, BIGGO aims to create lasting value for users, partners, and the broader Web3 ecosystem.

3. Vision

Building a trusted, innovative, and community-powered digital economy for the next generation.

4. Mission

The mission of BIGGO COIN is to build a transparent, sustainable, and community-driven Web3 ecosystem by focusing on the following objectives:

- Build accessible Web3 products.
- Encourage transparent participation.
- Expand practical ecosystem utilities.
- Support long-term ecosystem sustainability.
- Build strategic partnerships.

5. BIGGO Ecosystem

Ecosystem Overview

The BIGGO ecosystem is designed as an integrated, community-powered digital economy built on **BNB Smart Chain (BEP-20)**. Each component is developed to

provide practical utility, promote transparent participation, and support the long-term sustainability of the ecosystem.

The ecosystem consists of six core components that work together to create a secure, scalable, and sustainable Web3 platform.

BIGGO Reward Center

The BIGGO Reward Center serves as the primary participation hub where eligible users engage in ecosystem activities and receive rewards in accordance with applicable platform rules. It is designed to encourage active community participation while maintaining transparency and fairness.

BIGGO Revenue Engine

The BIGGO Revenue Engine supports the long-term sustainability of the ecosystem by providing diversified revenue sources that contribute to platform development, ecosystem expansion, responsible treasury management, and community growth.

BIGGO Marketplace

The BIGGO Marketplace is designed to facilitate digital commerce within the ecosystem by enabling users and partners to access products, services, and future ecosystem utilities through a secure and transparent environment.

BIGGO Launchpad

The BIGGO Launchpad is intended to support selected blockchain and Web3 initiatives by providing an ecosystem for collaboration, innovation, and responsible project growth.

Treasury Transparency Dashboard

The Treasury Transparency Dashboard is designed to improve transparency and accountability by providing the community with visibility into treasury management and the responsible allocation of ecosystem resources.

Automatic Buyback Program

The Automatic Buyback Program is designed to support long-term ecosystem sustainability through responsible treasury management and transparent buyback activities in accordance with the project's operational policies.

Ecosystem Principles

The BIGGO ecosystem is built upon the following principles:

- Transparency
- Security
- Sustainability
- Innovation
- Accessibility
- Community Collaboration

Integrated Ecosystem

The six core components operate together to create a unified ecosystem that encourages responsible participation, continuous innovation, sustainable development, and long-term value creation for the global BIGGO community.

Conceptual Ecosystem Flow

Community → BIGGO Reward Center → BIGGO Revenue Engine → BIGGO Marketplace → BIGGO Launchpad → Treasury Transparency Dashboard → Automatic Buyback Program → Long-Term Ecosystem Sustainability

Summary

The BIGGO ecosystem is designed to deliver practical utility through an integrated set of products and services that prioritize transparency, responsible management, and long-term ecosystem sustainability. As the platform evolves, additional features and strategic collaborations may be introduced to further strengthen the ecosystem while remaining aligned with the project's core principles.

6. Membership Program

The **BIGGO Membership Program** is a participation feature within the **BIGGO Reward Center**, designed to provide users with structured access to eligible ecosystem activities and selected platform features through a transparent and community-oriented framework.

The program is intended to encourage active participation, strengthen community engagement, and support the long-term sustainability of the BIGGO ecosystem while maintaining a simple, transparent, and user-friendly experience.

As the BIGGO ecosystem evolves, the Membership Program may be enhanced with additional participation features and ecosystem benefits in alignment with the ongoing development of the **BIGGO Reward Center** and the project's long-term objectives.

7. BIGGO Reward Center

The **BIGGO Reward Center** serves as the central participation hub within the BIGGO ecosystem. It is designed to encourage community engagement by providing users with opportunities to participate in eligible ecosystem activities in accordance with applicable platform rules.

The Reward Center promotes a transparent, fair, and user-oriented experience while supporting responsible ecosystem growth. Rewards are provided through structured participation designed to encourage long-term community engagement and contribute to the overall sustainability of the ecosystem.

As the BIGGO ecosystem continues to evolve, the Reward Center may expand to support additional products, services, and participation opportunities while remaining aligned with the project's core principles of transparency, security, accessibility, and sustainability.

8. BIGGOPO Utility

BIGGOPO is an internal ecosystem utility point designed to support user participation and engagement within the BIGGO ecosystem. It serves as a participation mechanism that connects eligible ecosystem activities with various platform features and community experiences.

BIGGOPO is intended exclusively for use within the BIGGO ecosystem and is not designed to function as a tradable digital asset, cryptocurrency, or investment instrument. In accordance with the platform's ecosystem rules, eligible BIGGOPO may be processed into **BIGGO** through the official ecosystem conversion mechanism while supporting a transparent, structured, and community-oriented user experience.

As the BIGGO ecosystem continues to expand, the utility of BIGGOPO may evolve to support additional ecosystem products, services, and participation opportunities, while remaining aligned with the project's principles of transparency, sustainability, responsible ecosystem development, and long-term ecosystem sustainability.

9. BIGGO Revenue Engine

Overview

The **BIGGO Revenue Engine** is designed to support the long-term sustainability of the BIGGO ecosystem through diversified revenue sources and responsible financial management. It provides the economic foundation that enables continuous platform development, ecosystem expansion, and long-term community growth.

Rather than relying on a single source of funding, the Revenue Engine is structured to support a resilient ecosystem capable of adapting to future technological developments, market conditions, and user adoption.

Core Objectives

The BIGGO Revenue Engine is designed to:

- Diversify ecosystem revenue sources.
- Support sustainable ecosystem funding.
- Enable continuous platform development.
- Strengthen community growth and ecosystem expansion.
- Promote responsible treasury management.

Sustainability Framework

The Revenue Engine follows principles of transparency, accountability, and long-term sustainability. Resources generated within the ecosystem are intended to support ongoing innovation, operational resilience, infrastructure improvements, strategic initiatives, and the continued delivery of practical ecosystem utilities.

Long-Term Vision

As the BIGGO ecosystem evolves, the Revenue Engine is expected to expand alongside new products, services, partnerships, and ecosystem opportunities. This approach is intended to strengthen the long-term resilience of the platform while remaining aligned with the project's commitment to responsible growth, community participation, and sustainable ecosystem development.

10. Treasury Transparency Dashboard

Overview

The **Treasury Transparency Dashboard** is designed to strengthen transparency and accountability within the BIGGO ecosystem by providing the community with greater visibility into treasury management and the responsible use of ecosystem resources.

The dashboard reflects the project's commitment to responsible governance practices, operational integrity, and long-term ecosystem sustainability.

Core Principles

The Treasury Transparency Dashboard is built upon the following principles:

- **Transparency** — Promote clear and accessible visibility into treasury activities and ecosystem resource management.
- **Accountability** — Support responsible oversight and reinforce confidence through transparent operational practices.
- **Responsible Fund Management** — Encourage prudent and sustainable management of ecosystem resources to support long-term platform development and community initiatives.
- **Community Confidence** — Strengthen trust by providing a transparent framework that supports informed community engagement and responsible ecosystem stewardship.

Long-Term Commitment

As the BIGGO ecosystem continues to grow, the Treasury Transparency Dashboard is expected to evolve alongside the platform by introducing enhanced transparency features and reporting capabilities. This ongoing commitment supports responsible financial management while reinforcing the project's vision of building a trusted, innovative, and community-powered digital economy.

11. Automatic Buyback Program

Overview

The **Automatic Buyback Program** is designed to support the long-term sustainability of the BIGGO ecosystem through transparent treasury management and responsible ecosystem operations.

As part of the ecosystem's sustainability framework, the program is intended to contribute to the healthy development of the platform by aligning treasury activities with the project's long-term objectives and responsible financial management principles.

Core Principles

The Automatic Buyback Program is guided by the following principles:

- **Transparency** — Operate within a transparent treasury management framework that promotes openness and accountability.
- **Sustainability** — Support the long-term resilience and sustainability of the BIGGO ecosystem through responsible resource management.
- **Responsible Treasury Management** — Align buyback activities with prudent treasury practices and the overall needs of the ecosystem.
- **Community-Oriented Development** — Contribute to the continued growth and stability of the ecosystem in support of its global community.

Long-Term Commitment

The Automatic Buyback Program is intended to evolve alongside the BIGGO ecosystem as new products, services, and ecosystem initiatives are introduced. Any future enhancements will continue to prioritize transparency, responsible treasury management, and the long-term sustainability of the ecosystem while remaining consistent with the project's guiding principles.

12. Token Overview

Token Information

Item	Description
Token Name	BIGGO COIN
Symbol	BIGGO
Blockchain Network	BNB Smart Chain (BSC)
Token Standard	BEP-20
Purpose	Ecosystem Utility Token
Total Supply	1,000,000,000 BIGGO
Decimals	18
Smart Contract Address	0x95A87AD38d191f4DCE5698791c7E38CC323d8B93

Token Utility

BIGGO COIN functions as the primary ecosystem utility token within the BIGGO platform. It is designed to facilitate participation across ecosystem products and services while supporting a transparent, secure, and sustainable digital economy.

The token is intended to integrate with the BIGGO ecosystem, including the **BIGGO Reward Center**, **BIGGO Revenue Engine**, **BIGGO Marketplace**, **BIGGO Launchpad**, **Treasury Transparency Dashboard**, and the **Automatic Buyback Program**, enabling a unified and practical Web3 user experience.

Design Principles

The BIGGO token economy is built upon the following principles:

- Transparency
- Security
- Practical Utility
- Responsible Ecosystem Growth
- Long-Term Sustainability

13. Token Allocation

Allocation Overview

The total supply of **1,000,000,000 BIGGO** is allocated to support the long-term development, sustainability, and expansion of the BIGGO ecosystem. The allocation is designed to balance community growth, platform development, market liquidity, strategic collaboration, and operational resilience.

ALLOCATION CATEGORY	PERCENTAGE	TOKEN ALLOCATION
Community & Ecosystem	40%	400,000,000 BIGGO
Liquidity Pool	20%	200,000,000 BIGGO
Marketing & Growth	15%	150,000,000 BIGGO
Development Fund	10%	100,000,000 BIGGO
Strategic Partnerships	10%	100,000,000 BIGGO
Reserve Fund	5%	50,000,000 BIGGO
Total Supply	100%	1,000,000,000 BIGGO

Allocation Principles

The token allocation is guided by the following principles:

Community-Centric Growth — Prioritize ecosystem expansion and active community participation.

Sustainable Development — Support continuous platform innovation and long-term product development.

Healthy Liquidity — Maintain sufficient liquidity to facilitate a stable and efficient ecosystem.

Strategic Collaboration — Enable partnerships that strengthen adoption and ecosystem expansion.

Responsible Reserve Management — Maintain strategic reserves to support operational resilience and future ecosystem opportunities.

Long-Term Commitment

The allocation framework is designed to support the sustainable growth of the BIGGO ecosystem while promoting transparency, responsible resource management, and long-term value creation. Any future adjustments, where applicable, will be implemented in accordance with the project's governance framework, operational policies, and commitment to transparency.

14. Security

Security Overview

Security is one of the fundamental pillars of the BIGGO ecosystem. The project is committed to maintaining a secure, transparent, and reliable blockchain environment through responsible development practices and continuous operational improvements.

BIGGO COIN is deployed as a **BEP-20** token on **BNB Smart Chain (BSC)** using the official smart contract:

Smart Contract Address

0x95A87AD38d191f4DCE5698791c7E38CC323d8B93

Users are encouraged to verify this official contract address through authorized BIGGO communication channels before interacting with the token.

Security Principles

The BIGGO ecosystem is guided by the following security principles:

- **Smart Contract Transparency** — Utilize a clearly identified official smart contract to promote transparency and on-chain verification.
- **Secure Blockchain Infrastructure** — Leverage the security, efficiency, and reliability of the BNB Smart Chain network.
- **Responsible Access Management** — Apply appropriate operational controls to help protect ecosystem integrity.
- **Continuous Monitoring** — Continuously monitor and improve the ecosystem to support operational reliability and long-term sustainability.
- **Community Awareness** — Encourage users to verify official information, use trusted wallet applications, and remain vigilant against phishing attempts and fraudulent activities.

Long-Term Commitment

BIGGO is committed to maintaining high standards of security, transparency, and responsible ecosystem management. Security practices will continue to evolve alongside technological advancements and ecosystem growth, reinforcing the project's vision of building a trusted, innovative, and community-powered digital economy.

15. Roadmap

Roadmap Overview

The BIGGO roadmap outlines the project's long-term strategic direction and reflects its commitment to building a transparent, innovative, and community-powered digital economy. Rather than being tied to fixed dates, the roadmap is organized into progressive development phases that allow the ecosystem to adapt to technological advancements, market conditions, regulatory developments, and community needs.

Phase 1 — Foundation

Establish the core infrastructure of the BIGGO ecosystem, including project branding, website, smart contract deployment, ecosystem architecture, security framework, and community development.

Key Focus

- Ecosystem foundation
 - Smart contract deployment
 - Website and platform infrastructure
 - Community building
 - Security and transparency
-

Phase 2 — Ecosystem Expansion

Expand the ecosystem by strengthening user participation, introducing additional platform capabilities, and growing strategic collaborations that support sustainable ecosystem development.

Key Focus

- BIGGO Reward Center expansion
 - BIGGO Revenue Engine enhancement
 - Marketplace development
 - Strategic partnerships
 - Community engagement
-

Phase 3 — Product Growth

Accelerate ecosystem adoption through the introduction of new products, service enhancements, platform optimization, and broader ecosystem integration.

Key Focus

- BIGGO Launchpad development
 - Treasury Transparency Dashboard expansion
 - Platform optimization
 - Ecosystem integration
 - User experience improvements
-

Phase 4 — Global Adoption

Support the long-term maturity of the ecosystem by expanding global participation, strengthening strategic collaborations, encouraging continuous innovation, and maintaining responsible ecosystem sustainability.

Key Focus

- Global ecosystem expansion
 - International partnerships
 - Continuous innovation
 - Responsible treasury management
 - Automatic Buyback Program enhancement
-

Roadmap Principles

The roadmap is guided by the following principles:

- Transparency
- Innovation
- Sustainability
- Community Collaboration
- Responsible Growth

The roadmap represents the strategic vision of BIGGO COIN and may evolve over time to remain aligned with the project's long-term objectives and the changing needs of the global Web3 ecosystem.

16. Frequently Asked Questions (FAQ)

What is BIGGO COIN?

BIGGO COIN is a BEP-20 ecosystem utility token built on **BNB Smart Chain (BEP-20)**. It is designed to support participation across the BIGGO ecosystem while promoting transparency, practical utility, and long-term ecosystem sustainability.

What is the purpose of BIGGO COIN?

BIGGO COIN functions as the primary ecosystem utility token used across the BIGGO platform. It supports participation in ecosystem products and services while enabling a unified Web3 ecosystem experience.

What is the BIGGO Ecosystem?

The BIGGO ecosystem consists of six integrated core components:

- BIGGO Reward Center
- BIGGO Revenue Engine
- BIGGO Marketplace
- BIGGO Launchpad
- Treasury Transparency Dashboard
- Automatic Buyback Program

Each component is designed to work together in support of a transparent, secure, and sustainable ecosystem.

What is the BIGGO Reward Center?

The BIGGO Reward Center is the primary participation hub where eligible users engage in ecosystem activities and receive rewards in accordance with applicable platform rules.

What is BIGGOPO?

BIGGOPO is an internal ecosystem utility point that supports user participation and engagement within the BIGGO ecosystem. It is intended exclusively for ecosystem use and is not designed to function as a tradable cryptocurrency or investment instrument. Eligible BIGGOPO may be processed into BIGGO through the official ecosystem conversion mechanism in accordance with platform rules.

What is the BIGGO Revenue Engine?

The BIGGO Revenue Engine is designed to support long-term ecosystem sustainability through diversified ecosystem revenue sources that contribute to platform development, responsible treasury management, ecosystem expansion, and community growth.

What is the Treasury Transparency Dashboard?

The Treasury Transparency Dashboard is designed to provide greater transparency and accountability by offering visibility into responsible treasury management and ecosystem resource allocation.

What is the Automatic Buyback Program?

The Automatic Buyback Program supports long-term ecosystem sustainability through responsible treasury management and transparent buyback activities in accordance with the project's operational policies.

What blockchain does BIGGO use?

BIGGO COIN is deployed on **BNB Smart Chain (BEP-20)**.

What is the total supply of BIGGO?

The total supply is **1,000,000,000 BIGGO**.

What is the official smart contract?

0x95A87AD38d191f4DCE5698791c7E38CC323d8B93

Users are encouraged to verify the contract address through the project's official communication channels before interacting with the token.

Is BIGGO COIN an investment product?

No.

BIGGO COIN is designed as an ecosystem utility token. Ownership or use of BIGGO COIN does not represent equity ownership, securities, debt instruments, or any other financial interest in the project.

Where can I find official BIGGO information?

Official project information is available through the BIGGO website, official whitepaper, and official community channels.

17. Legal Disclaimer

Purpose of This Document

This Whitepaper is provided solely for informational purposes to present an overview of the BIGGO COIN ecosystem, its objectives, technology, and long-term development vision. It is intended to help community members, partners, and stakeholders better understand the project and should not be interpreted as a legally binding commitment or contractual agreement.

Utility Token Statement

BIGGO COIN is designed as an ecosystem utility token within the BIGGO platform. Its intended purpose is to support participation across ecosystem products and services and facilitate access to designated platform utilities.

Ownership or use of BIGGO COIN does not represent equity ownership, shares, securities, debt instruments, or any other financial interest in the project or its contributors.

Risk Notice

Participation in blockchain ecosystems and the use of digital assets involve various risks, including but not limited to technological, operational, cybersecurity, regulatory, and market-related risks. Users are encouraged to carefully evaluate these risks and conduct their own independent research before participating in the BIGGO ecosystem.

Regulatory Compliance

BIGGO is committed to operating responsibly and seeks to align its ecosystem development with applicable laws and regulatory requirements where appropriate. As digital asset regulations continue to evolve across different jurisdictions, ecosystem features, products, or services may be updated or modified to support ongoing compliance and responsible operations.

No Investment Advice

Nothing contained in this Whitepaper constitutes investment, financial, legal, accounting, or tax advice, nor should it be interpreted as an offer, solicitation, recommendation, or invitation to purchase, sell, or invest in any digital asset or financial instrument.

All participants are solely responsible for their own decisions and should seek independent professional advice where appropriate.

Forward-Looking Statements

This Whitepaper may contain forward-looking statements regarding the planned development of the BIGGO ecosystem, future products, services, partnerships, and strategic initiatives. These statements reflect current expectations and objectives but

are subject to change due to technological developments, regulatory changes, market conditions, community feedback, or other factors beyond the project's control.

Future developments described in this document should not be interpreted as guarantees, commitments, or assurances that any specific milestone, feature, or timeline will be achieved.

Closing Statement

Building the Future of Digital Value

BIGGO COIN is committed to building a trusted, innovative, and community-powered digital economy through practical ecosystem utilities, transparent treasury management, responsible development, and continuous innovation.

As the ecosystem continues to evolve, BIGGO remains focused on delivering long-term sustainability, meaningful community participation, and responsible ecosystem growth while maintaining transparency and operational integrity.

We welcome community members, partners, developers, and strategic collaborators to join us in building the next generation of the digital economy.

Together, we build a stronger, transparent, and community-powered future.
